

Application

Access boxes provide a protective and accessible point for underground valves, meters, and more.

They protect from impact, weather and traffic, while allowing easy access for maintenance or emergency shut-off.

Quad Box

Technical Specification

The Quad surface box is made from **High Density Reprocessed Polypropylene (PP)** and is designed with a heavy-duty hinged lid that folds back on its self to avoid pedestrian injury and give easy access for maintenance on essential utilities.

The lid is held in position by four robust, snap fit clip fittings, which **do not require a key**.

These boxes are used by many maintenance and installation companies in the UK, and can be customised to accommodate for **Gas, Water** or **CATV** where necessary.

These boxes are available in a **high-visibility Yellow**, and also features a **Galvanised Detection Plate** for easy finding in overgrowth or low visibility, locations.

*This is a **made to order** item*
