

Application

Rebar protection caps are used to cover the ends of exposed reinforcing bars during construction

Their primary purpose is to reduce the risk of injury to on-site personnel

Safety Rebar Caps

Technical Specification

Our Safety Rebar Caps are available in **two sizes** to cover the full range of reinforcing bars commonly used in modern construction – from **6mm to 32mm** diameter

Made from **Virgin Polypropylene (PP)** these caps are naturally resistant to environmental wear. This item is offered in a **high-visibility** yellow colour to warn visitors of the potential dangers on-site

*This is a **stock item** available for immediate delivery.*
