

## Application

The 3/4 inch – 1 inch Base is a purpose-built stop-tap base, designed for utility pipe installations where secure and adaptable support is required.

Suitable for use with various pipe diameters.

# 3 / 4 – 1 inch Base

## Technical Specification

Engineered by Techmarkets, this **Reprocessed Polypropylene (PP51)** base provides a reliable foundation for **above-ground stop-tap** assemblies.

Accommodating varying pipe diameters with ease and ensuring stable positioning in service environments.

These Stop Tap Bases provide a solution for the regular sizes of stop tap commonly found in modern civils and construction (**25mm and 32mm**)

*This is a **made to order** item.*
