

Application

Plaster plugs are used for securing lining boards to concrete and brickwork.

If required, a sealing washer can be used under the head for a watertight fix.

Plaster Plugs

Technical Specification

Our Plaster Plugs are designed to secure **insulated plasterboards** in place against concrete and brickwork.

These plugs are made from corrosion resistant **Virgin Polypropylene (PP)** and are available in a 60mm length.

To secure these fixings an **8mm** hole should be drilled into the base material underneath

Plaster Plugs and Sealing Washers can be purchased separately or pre-assembled.

*This is a **stock item** available for immediate delivery.*

Pack Quantities

Our plugs can be re-packed to your specification

Product Code	Product	Inner Bag Quantity	Outer Bag Quantity
90057	Plaster Plug	200	1,000 (5 inner bags)
90058	Plaster Plug (With Seal)	200	1,000 (5 inner bags)
