

Application

Damp Plugs are used in damp-proofing to secure specialist membranes to base materials, usually concrete or brick

A central hole also accepts wood screws to allow for securing timber battens

Damp Plugs & Seals

Technical Specification

Made from either **Reprocessed High-Density Polyethylene (HDPE)**, or **Nylon**, so the key properties of this product are **resistance** to corrosion and **strength**.

A **10mm** hole is required to be drilled through membranes and into the base material to ensure a strong fix

A separate **sealing washer** is also available to provide a watertight seal under the head.

*This is a **stock item** available for immediate delivery*

Pack Quantities

Plugs can be packed to your specification with or without seals

Product Code	Product	Inner Bag Quantity	Outer Bag Quantity
20063	Damp Plug (HDPE)	100	1,000
