

Application

Damp Plugs are used in damp-proofing to secure specialist membranes to base materials, usually concrete or brick

A central hole also accepts wood screws to allow for securing timber battens

Sealing Washers

Technical Specification

Made from **Thermoplastic Elastomer (TPE)**, these sealing washers help to maintain high thermal values when drilling into insulation materials or brick.

These seals are compatible with our **Damp Plugs**, **Brick Plugs** and **Plaster Plug** insulation fixings. They can be bought independently, or attached to your chosen fixing and sold as a complete unit.

They are sold in 3 colour variations. Natural is commonly paired with **HDPE Damp Plugs** whereas Orange and Yellow are more commonly found with Nylon Plugs

*This is a **stock item** available for immediate delivery*

Pack Quantities

Plugs can be packed to your specification with or without seals

Product Code	Colour	Internal Diameter	Bag Quantity
20078	Natural	7mm	5000 (5 x 1000)
